PROFILE

A passionate full stack developer with a strong computer science background and expertise in the MERN stack. Proficient in JavaScript, the backbone of my development journey, with a focus on crafting dynamic, responsive, and efficient applications. Experienced in building projects such as a restaurant booking system, a travel journal platform, and an e-commerce website. Currently focused on deepening my knowledge in full-stack development, with a goal to create scalable, user-centered applications by leveraging my strengths in both front-end and back-end technologies.

HIGHLIGHTED SKILLS

- **Front End Development:** HTML, CSS, JavaScript, Bootstrap, React, Django
- **Back End Development:** PHP, JavaScript, Express, Python, [Node.js](#), Golang
- **Databases:** SQL, MongoDB (NOSQL)
- **Languages:** Arabic (Native), English (Fluent)

SOFTWARE ENGINEERING EXPERIENCE

Software Engineering Program | Reboot Coding Institute, Bahrain

Jun 2025 - EXP Jun 2027

Projects:

1. **Social Network:** Developed a full-stack Facebook-like social networking platform featuring user profiles, followers, privacy-controlled posts and comments, groups and events, real-time chats, and notifications. Implemented session-based authentication, image handling, WebSocket communication, SQLite database migrations, and Dockerized frontend and backend services. **Tools Used:** React, JavaScript, HTML, CSS, Golang, SQLite, WebSockets, Docker
2. **Real-Time Forum:** Developed a full-stack real-time web forum that enables user communication through posts, comments, and live direct messaging using WebSockets, with features for authentication, content categorization, and interactive discussions. **Tools Used:** HTML, JavaScript, Golang

Software Engineering Immersive Fellow | General Assembly, Bahrain

Aug 2024 - Nov 2024

Projects:

1. **Bon Voyage:** is an interactive travel blogging platform where users can share their travel experiences, connect with other travelers, and explore new destinations through firsthand stories. **Tool Used:** MERN Stack
2. **Drive & Drift:** is a comprehensive vehicle rental website designed to simplify the process of renting vehicles for individuals and businesses. **Tool Used:** MERN Stack
